

NIMDAL
TAK CHANWOO

FOUNDER / OPERATOR / PRODUCT BUILDER – SINCE 2012

TAK CHANWOO / NIMDAL

I BUILD THE SYSTEM BEHIND THE GROWTH.

I have spent my career connecting strategy to the work that makes it real: campaigns, communities, operating dashboards, product QA, market entry, and the teams responsible for shipping them.

VENTURE BUILDING

GROWTH SYSTEMS

COMMUNITY / KOREA GTM

PRODUCT OPERATIONS

Nimdal is the public identity. Tak Chanwoo is the operator behind it: a founder who has moved from social-impact platforms to agency scale, Web3 communities, product operations, and a new venture.

GROWTH RECORD

EVIDENCE INDEX / 2026

152 projects mapped, 117 backed by direct execution records, and research-only work excluded from claimed experience.

ONE CAREER. FIVE OPERATING SYSTEMS.

The industries changed, but the work kept compounding: connect people, clarify the operating model, build the feedback loop, and turn what works into a repeatable system.

01 2012 – 2016 FOUNDER / MAKORANG LAB STARTED WITH SOCIAL VALUE. Built and operated a CSR digital platform that connected companies, nonprofits, and consumers through participation-led campaigns. CSR / PLATFORM / PARTNERSHIPS	02 2018 – 2024 FOUNDER / MKR LEARNED TO SCALE EXECUTION. Founded a marketing agency, led 200+ public and commercial projects, and operated a 3,000+ creator and influencer network. 200+ PROJECTS / 3,000+ NETWORK	03 2025 COMMUNITY & GTM / 071LABS TURNED ATTENTION INTO BELONGING. Connected global Web3 projects with Korean users and grew an active community from roughly 200 to more than 3,000 members. 15X ACTIVE COMMUNITY GROWTH	04 2025 – 2026 ALPHA DUO / MYLOL / NEVADA MOVED FROM CAMPAIGNS INTO PRODUCTS. Joined product QA, private beta operations, SEO, KOL pipelines, dashboards, and market-entry execution across web, app, game, and Web3 products. QA / BETA / GTM / ANALYTICS	05 2026 – NOW CO-FOUNDER & COO / FIVE OVER TWO NOW PRODUCTIZING THE OPERATING SYSTEM. Designing Korea Launch and Growth Ops services while turning repeatable consulting workflows into SaaS and MVP products. SERVICES → SYSTEMS → PRODUCTS
---	--	---	--	--

GROWTH IS NOT A CHANNEL. IT IS AN OPERATING MODEL.

My range sits between the strategy deck and the live system: designing the plan, assigning ownership, coordinating production, reading the signals, and carrying the learning into the next cycle.

Growth Systems ■ Search, content, paid media, and commerce ■ Channel architecture and KPI design ■ Monthly reporting and next-action loops ■ Integrated acquisition operations	Community & Korea GTM ■ Korean messaging and SEO localization ■ KOL, ambassador, and partner pipelines ■ AMA, campaign, and onboarding operations ■ Community signal and response management	Product Operations ■ Product requirements and UX/UI QA ■ Responsive, multilingual, and flow testing ■ Private beta recruitment and operation ■ Web, app, and game launch coordination	Venture Building ■ Agency and consulting service design ■ Government support and business plans ■ Delivery systems, contracts, and governance ■ SaaS and MVP productization
--	--	---	---

SIX OPERATING SYSTEMS IN THE WILD.

Selected from execution-confirmed records. Each case separates the objective, the work I owned, the signals we managed, and the system left behind.

RECENT CAMPAIGN

COMMERCE / INTEGRATED DIGITAL MARKETING

Joya Integrated Commerce Engine

COMMERCE / INTEGRATED DIGITAL MARKETING

OBJECTIVE	Connect a fragmented online sales operation into one measurable customer-acquisition system.
ROLE	Campaign planning, channel architecture, content cadence, paid-search coordination, creator campaigns, and monthly reporting.
KPI	Store traffic, search visibility, content output, campaign response, and order signals.
RESULT	Unified the homepage, Smart Store, Smart Place, Naver and Google search, creator sampling, and reporting into one operating rhythm.

RECENT CAMPAIGN

HEALTHCARE / LOCAL SEARCH

H Animal Hospital Local Trust Engine

HEALTHCARE / LOCAL SEARCH

OBJECTIVE	Build a repeatable trust and discovery system for a local medical practice.
ROLE	Local search planning, branded-blog operation, experience campaign coordination, and monthly reporting.
KPI	Weekly publishing cadence, local search exposure, content response, and operating continuity.
RESULT	Established a five-post weekly content rhythm with experience campaigns and recurring performance review.

2024 - 2026

EXECUTION - CAMPAIGNS

PREMIUM RETAIL / INTEGRATED OPERATIONS

Leica Omnichannel Performance Desk

PREMIUM RETAIL / INTEGRATED OPERATIONS

OBJECTIVE	Make premium-brand acquisition and order signals visible across every active digital channel.
ROLE	Integrated campaign planning, search and content operations, channel QA, KPI management, and reporting.
KPI	Search exposure, homepage activity, content, Instagram, experience campaigns, and order status.
RESULT	Operated a shared performance system spanning homepage, advertising, content, social, sampling, orders, and visibility.

04

2018.06 - 2024.11

EXECUTION - CAMPAIGNS

FOUNDER / 200+ PROJECTS

MKR Agency Operating System

FOUNDER / 200+ PROJECTS

OBJECTIVE	Build an agency that could repeatedly translate complex client needs into deliverable marketing work.
ROLE	Founder: service design, sales, campaign direction, partner coordination, QA, reporting, education, and consulting.
KPI	Project delivery, partner capacity, reporting consistency, client continuity, and network scale.
RESULT	Led 200+ public and commercial projects while operating a network of more than 3,000 creators and influencers.

2025.01 - 2025.09

EXECUTION - CAMPAIGNS

WEB3 COMMUNITY / KOREA GTM

071Labs Community Growth System

WEB3 COMMUNITY / KOREA GTM

OBJECTIVE	Turn a small active community into a durable Korean-market gateway for global Web3 projects.
ROLE	Community management, Korean GTM, project onboarding, campaign operation, and member response loops.
KPI	Active members, participation, onboarding quality, content response, and community continuity.
RESULT	Grew the active community from roughly 200 members to more than 3,000, a 15x increase.

GLOBAL WEB3 / KOREA LAUNCH

NEVADA Korea GTM Control Room

GLOBAL WEB3 / KOREA LAUNCH

OBJECTIVE	Translate a complex global trading product into a coordinated Korean-market launch system.
ROLE	Korean GTM strategy, KOL and ambassador operations, SEO, content planning, dashboard design, and agency coordination.
KPI	200+ KOL pipeline, ambassador contracts, OKRs, content calendar, CRM status, and execution cadence.
RESULT	Built a connected operating layer across strategy, KOL CRM, ambassador agreements, OKRs, content, and reporting.

HOW

I turn vague growth problems into systems people can understand, trust, and act on.

01

PROBLEM INTELLIGENCE

BRIEF
MARKET
USER
KPI

DECODE

Find the real growth problem inside the brief by reading audience friction, market pressure, search intent, and decision risk before choosing channels.

BRIEF MATRIX

COMPETITOR / SERP SCAN

AUDIENCE FRICTION MAP

OUTCOME

One problem statement, target logic, and KPI guardrails before production starts.

02

SYSTEM DESIGN

ROLES
ANGLES
OWNERS
CADENCE

FRAME

Turn messy inputs into a campaign architecture: channel roles, content angles, owner map, operating cadence, and reporting logic.

CHANNEL MAP

KPI TREE

CONTENT / TASK BOARD

OUTCOME

A plan that clients, teams, and partners can execute without interpretation drift.

03

EXECUTION CONTROL

COPY
DESIGN
KOL
QA

SHIP

Coordinate copy, design, KOL/community, search, web, and partner deliverables with QA before the work goes live.

PRODUCTION QUEUE

QA CHECKLIST

LAUNCH NOTES

OUTCOME

Assets ship on cadence, with clearer channel fit and fewer late-stage reversals.

04

LEARNING LOOP

GA4
UTM
REPORT
NEXT

COMPOUND

Read response signals, separate noise from useful evidence, report the next move, and convert learning into the next cycle.

GA4 / UTM VIEW

CLIENT REPORT

NEXT-ACTION BACKLOG

OUTCOME

Decisions, renewals, and follow-up campaigns become easier to justify.

Docs & Business Planning

- Google Workspace (Docs / Sheets / Slides)
- Notion
- PowerPoint / Excel
- Business plans
- Government support programs

Creative Production

- Photoshop
- Premiere Pro
- After Effects
- Content production
- Campaign asset editing

AI & Development

- Codex
- Claude Code
- AntigraVity
- MCP
- Web development
- Application development
- Game development

Marketing & Distribution

- SEO
- Naver Blog / Search / Smartplace
- GA4 / UTM Dashboard
- Google Play / App Store publishing
- SNS / Community channels
